THE RECYCLING SYSTEM FOR THE INDEPENDENT AUTOMOTIVE AFTERMARKET

...more than
just recycling!

OUR SERVICES

Today, many environmental laws in Europe are stipulated by the European Commission and subsequently have to be implemented into national law by the governments of the member states.

For example:

- End of life vehicle
- Packaging decree
- WEEE Directive (Waste of Electrical and Electronic Equipment)

ALL SERVICES

FROM ONE

SOURCE

THE COMPANY

**TO AVOID
TO DISPOSE
TO RECYCLE**

In addition to fulfilling the environmental law requirements for the automotive parts industry **PARTSLIFE** focuses on:

- Recycling
- Waste disposal in workshops
- Improvement of the disposal situation
- Representation of interests at local authority levels
- And Core return

PARTSLIFE and its logistic partners offer a network all over Europe.

Further **PARTSLIFE** Service offers:

- Individual disposal solution for our partners for example the central recirculation of vehicle batteries

OUR CUSTOMERS

More than 7,000 workshops trust in the **PARTSLIFE** waste-disposal system.

A lot of automotive parts manufacturers trust in the **PARTSLIFE**-system for fulfilling of the packaging ordinances and regulations.

Many customers from industry and commerce have authorised **PARTSLIFE** to organise individual return systems for cores and waste.

**WE OFFER THE
SOLUTION!**
